## GOLD & SILVER & COPPER RINGS

The rings helped to heal the **arthritis** in my hands. Praise our GOD.

What rings? What arthritis? What's going on?

It got so bad that I couldn't unscrew the top from the peanut butter jar. I prayed and asked for healing. A set jaw, a forceful attitude, and much prayer, but I still couldn't get to the peanut butter. Pain? Yes! Lots!

About that time I was studying in the Psalms and ran across a very strange verse. I had heard some young people sing it before. But in over 50 years I've never heard any preaching about this. **It is the answer.**

"He brought them forth also with silver and gold; and there was not one feeble person among their tribes."  
Psalm 105:37

I had been studying "feeble" in the Bible because that's what I thought arthritis does. It makes you feeble. I wanted to be healed from feebleness.

I read the verse over and over again wondering if there was a connection between the metals and the fact that there was no feebleness. Or perhaps the one verse was about two subjects. They came out of Egypt with lots of money and also nobody got sick on the 40 year hike through the wilderness. I decided that the scripture meant that they wore silver and gold rings and bracelets and as a result they did not get sick.

That was a big step in Bible study, and in faith, and in belief.

Most preachers teach that God kept them strong and healthy. I have concluded that God told them what to do for themselves to keep themselves strong and healthy.

In other words, the miracle that kept them strong and healthy in the wilderness some 3500 years ago is still available to us some 3500 years later. But we have to know what to do.

**I concluded that the only Hebrew word that might be used for our 18.. 24K gold is "PAZ," Strong's 6337. It is the closest description of our jewelry grade gold.**

That is one Hebrew word for "gold" that does not tarnish and/or corrode over time. The other words used for "gold" are an amalgam of "gold" with other metals. An amalgam is an admixture of metals, an alloy, an adulteration. A gold amalgam will tarnish and/or corrode after a long time.

The three words that are "gold" amalgams are:

- 1) **GOLD**, Hebrew "CHARUWIS," Strong's 2742; this gold is hard and sharp, used for making tools. It might be a form of bright brass.
- 2) **GOLD**, Hebrew "ZAHAB," Strong's 2091, shall become tarnished, (Lam. 4:1). Pure gold cannot become tarnished. This is not pure gold. This gold has to be a mixture of gold with other metals (an amalgam).

- 3) **GOLD**, Hebrew "KEHTHEM," Strong's 3800, shall become changed (corroded). Pure gold can not become tarnished or corroded. This is not pure gold. This gold has to be a mixture of gold with other metals (an amalgam).

There are six more cases where the words for "gold" are combined with adjectives to form phrases that are often confused with the Hebrew word "PAZ," Strong's 6337.

The six more types of "gold amalgam" are:

- 1) **PURE GOLD**, PURE Hebrew "TAHOWR" 2889, GOLD Hebrew "ZAHAB" 2091, shall become tarnished, (Lam. 4:1)
- 2) **BEATEN GOLD**, type 1, BEATEN Hebrew "MIQSHAH" 4749, GOLD, Hebrew "ZAHAB" Strong's 2091, shall become tarnished, (Lam. 4:1)
- 3) **BEATEN GOLD**, type 2, BEATEN Hebrew "SHACHAT" 7820, GOLD, Hebrew "ZAHAB" Strong's 2091, shall become tarnished, (Lam. 4:1)
- 4) **WROUGHT GOLD**, WROUGHT, Hebrew "MISHBETSAW" 4865, GOLD, Hebrew "ZAHAB" Strong's 2091, shall become tarnished, (Lam. 4:1); closest to our drawn and/or cut golden wire.
- 5) **PERFECT GOLD** PERFECT, Hebrew "MIKLAW" 4357, GOLD, Hebrew "ZAHAB" Strong's 2091, shall become tarnished, (Lam. 4:1)
- 6) **REFINED GOLD**, REFINED, Hebrew "ZAWKAK" 2212, GOLD, Hebrew "ZAHAB" Strong's 2091, shall become tarnished, (Lam. 4:1). Apparently the refining process was not good enough to remove all of the impurities.

What is this? "Lam. 4:1"

Lamentations 4:1, How is the gold (2091) become **dim** (tarnished)! how is the most fine gold (3800) **changed** (corroded)!

All of the families of "gold" containing "Zahab, 2091" shall become **tarnished**.

All of the families of "gold" containing "KEHTHEM 3800" shall **corrode**.

Here is a surprise! A certain kind of **copper** (5178) is as valuable as **gold** (2091)!

Ezra 8:27

27 Also twenty basons of gold <02091>, of a thousand drams; and two vessels of fine <02896> <06668> copper <05178>, precious as gold <02091>.

Here is another surprise! **BRASS, BRAZEN**, Hebrew 5178, NEKHOSHETH may be translated "**a brazen impudent woman**" in relation to whorish actions. Ezek 16:36. Perhaps the etymology of that expression may explain our present expression "**she's a brazen hussy**." The brazen woman is a whore. In other words, brass is a substitute for true gold while the whore is a substitute for the true wife. The brazen whore -- the golden wife! A good wife is worth her weight in gold.

A long time ago I learned that when two dissimilar metals are separated by an electrolyte they form an electric battery. The amount of voltage that they produce is determined by their relative positions on the galvanic chart. The amount of current they are able to produce is controlled by the area of the plates and by the type of electrolyte.

When silver and copper (or when gold and silver) are separated by an electrolyte, small currents of electricity are generated when the metals are connected (touching). The electrolyte can be as weak as human perspiration (sweat). A strong electrolyte is lemon juice or tomato juice.

When a gold ring is worn next to a silver ring on a finger, the electrons move through the connection (touch point). **The ionized silver**

**enters the electrolyte (sweat) and a portion of the ionized silver enters the body through transdermal transfer.** The gold pushes the silver (or the silver pushes the copper) into the body through a process similar to electroplating. This can be demonstrated using an old (silver) dime, a (copper) penny, some salt water, and a 50 microamp galvanometer. The current will read 8 to 15 microamps. This represents the amount of electricity going through your body when you wear a silver ring next to a copper ring on your finger. They have to touch.

Some people have noticed that they break out when they wear a certain necklace with another certain necklace. This is an example of the uncontrolled process. Bi-metals can heal you and/or they can poison you.

We have discovered through empirical observation that platinum, gold, silver, and copper do not cause skin eruptions when they are good metals (no impurities in the metals). When the metals are impure some people report that they have too much acid to wear that jewelry or that watch. When in fact it may be impurities in the metals that cause them to experience skin eruptions and not their own sweat at all.

Ancient American Indians (Native Americans) used silver and copper bracelets to control arthritis. Present western jewelry stores sell copper bracelets for the same purpose. But the treatment has been corrupted by generations of misuse and misunderstanding. They leave out the silver. You must include silver.

Some people report relief after wearing copper only. They will get even more relief when they add silver because silver makes copper work better than by itself.

What about gold and silver and copper? I went to the medical library at Hershey Medical Center and this is what I found.

- **GOLD** is the ingredient used in an anti-inflammatory colloidal solution. It is used by Doctors to treat the last stages of arthritis.
- **SILVER** kills bacteria. It is used in filters to sterilize water. SILVER may also kill virus. Silver is used to treat skin burns.
- **COPPER** is a fungicide. It is used to kill fungus. Grandpa put Blue Stone (copper sulfate) on the potatoes to control fungus (rot).

Inflammation, bacteria (virus), and fungus, there is nothing left. When you control these you control your health.

Go get a gold ring, a silver ring, and a copper ring that fit your finger. Place them in that order. Place them on one or all of your fingers -- your choice. Do your regular chores. If you don't sweat much then immerse your hands in a salt solution; two tablespoons of salt to one quart of water. Doing the dishes is fine if you still use a sink and a wash cloth. Don't do a super job of rinsing off your hands. Wipe them off, but not in the area of the rings.

If you can afford it, also get a platinum ring. Place them in this order, platinum, gold, silver, and copper. That will put gold, silver, and copper into your body in minute amounts. The platinum pushes the gold, but nothing pushes the platinum.

If you break out in a rash, quit it. I have never heard of anyone having a side effect if the rings are pure metal. Sterling silver is 92 % silver and it works. Don't use Mexican silver<sub>3</sub>

or German silver. Don't try to save money when buying your rings. Go for the best.

The silver & copper rings worked for me. I was able to use platinum, gold, silver and copper on some bad fingers. I used silver & copper on others because I didn't have any more platinum and gold rings. It took three years. I was healed, so I set the rings aside. All arthritis is now gone from both hands. Praise our GOD. I was free for about two years. Now some arthritis is trying to come back. So I put the rings back on my fingers.

The bracelets never worked. Probably because I don't know how to make bracelets stay where I want them to stay. I even tried to make silver & copper chain stay where I wanted it to stay. If your arthritis is in your elbows or in your knees, keep trying. You will find a way to hold the rings or bracelets or chains in place near your bad joint.

Have you noticed advertisements telling that some major golfers are getting the idea about copper bracelets, now? Read their ads in the magazines, but watch out. Some are offering copper without the silver. Forget that.

Did you notice that a year or two after our government took silver coins out of our pockets and pocketbooks a group of new diseases, new bacteria, and new viruses appeared? Do you think there may be a connection? I do.

Psalm 105:37, He brought them forth also with **silver** and **gold**: and there was not one feeble person among their tribes.

Ecclesiastes 1:9 The thing that hath been, it is that which shall be; and that which is done is that which shall be done: and there is **no new thing under the sun.**

1 Thessalonians 5:23, And the very God of peace sanctify you wholly; and I pray God your whole **spirit** and **soul** and **body** be preserved blameless unto the coming of our Lord Jesus Christ.

Someone said, "But I don't have any arthritis! What good is this Bible lesson to me? Tell it to your grandmother who does. You may need it for the time you suffer an athletic injury causing inflammation of an internal organ. You may need it the next time someone sneezes on you. You may need it to keep from getting arthritis. Ask yourself, "what's in it for this author?" Somebody may take these facts and start a new business and become very wealthy, but it won't be me.

This is a Bible study describing what I think these verses may mean. This not the practice of medicine. No diagnosis is made. No prescription is offered

### THANK YOU

Thank you to all who helped us with the fund raising projects of the last few months. You provided for us again. Now I can again deeply study the scriptures and then share exciting discoveries like these with you. In the old days kings provided stipends to promising students so they could continue their studies. You did that for me. Now you are acting like a king (queen).

*Father, please make my students rich like kings. Bless them. I still need some more money. Please fix things so I won't have to say it (or even think it) any more.*
